

Mobile App Development with React Native

TEC-003 · Week 2 of 10 · IT and Technology

THIS WEEK'S FOCUS

Build reusable interface components.

STUDY LOAD

6 hours · Read · Watch · Apply

ACADEMIC STUDY CONNECTION

Apply this resource to Mobile App Development with React Native: Foundations and workflow. Use it to deepen the week's target outcome, "Build reusable interface components."

Lesson pathway

01 · Read

Build the concept using the attributed open resource below.

02 · Watch

Use the linked university or professor lesson as a second explanation.

03 · Apply

Create evidence from the guided activity and reflection prompt.

Open reading or reference

MIT OpenCourseWare · University open course

[Introduction to Computer Science and Programming in Python](#)

Read selectively for this week's foundations and workflow work. MIT OpenCourseWare terms

University or professor video

Harvard CS50 · HTML, CSS, JavaScript

[Open video lesson or university channel](#)

Watch with the Mobile App Development with React Native learning outcome in mind; take notes on an idea to test locally.

Guided learning activity

Complete a guided foundations and digital workflow activity using a Liberian or regional case study.

Evidence to save: Mobile prototype and test notes.

Reflect and connect

In 3–5 sentences, explain how this week’s concept could improve a real organisation, community service, workplace, or learner project in Liberia or your local context. Identify one assumption, one risk, and one action you would test next.

Source note: GentsAcademy created this original study guide and uses an original image representing young Liberian learners. External resources remain owned by their respective providers and should be used according to the licence or access terms stated on the source page.
