

Introduction to Artificial Intelligence and Machine Learning

TEC-008 · Week 8 of 10 · IT and Technology

THIS WEEK'S FOCUS

Evaluate a small prototype against clear criteria.

STUDY LOAD

6 hours · Read · Watch · Apply

ACADEMIC STUDY CONNECTION

Apply this resource to Introduction to Artificial Intelligence and Machine Learning: Responsible implementation and testing. Use it to deepen the week's target outcome, "Evaluate a small prototype against clear criteria."

Lesson pathway

01 · Read

Build the concept using the attributed open resource below.

02 · Watch

Use the linked university or professor lesson as a second explanation.

03 · Apply

Create evidence from the guided activity and reflection prompt.

Open reading or reference

California Community Colleges OERI · Curated academic OER collection

[OER for information technology and information systems](#)

Read selectively for this week's responsible implementation and testing work. Licence varies by source; verify on source page

University or professor video

MIT OpenCourseWare · Artificial Intelligence lecture videos

[Open video lesson or university channel](#)

Watch with the Introduction to Artificial Intelligence and Machine Learning learning outcome in mind; take notes on an idea to test locally.

Guided learning activity

Complete a guided responsible implementation and testing activity using a Liberian or regional case study.

Evidence to save: Problem brief and evaluation log.

Reflect and connect

In 3–5 sentences, explain how this week's concept could improve a real organisation, community service, workplace, or learner project in Liberia or your local context. Identify one assumption, one risk, and one action you would test next.

Source note: GentsAcademy created this original study guide and uses an original image representing young Liberian learners. External resources remain owned by their respective providers and should be used according to the licence or access terms stated on the source page.
