

# IT and Technology in Tourism: Digital Tour Operations

XDP-002 · Week 2 of 10 · Interdisciplinary

Study independently · keep a notebook · save your evidence

## THIS WEEK'S OUTCOME

**Design a booking and customer record process.**

## STUDY RHYTHM

**6 hours**

Short sessions work best: Read · Watch · Make · Reflect.

## START HERE · IN PLAIN LANGUAGE

In plain language, this lesson helps you work on design a booking and customer record process.. Treat shared sector problem as a skill you can build in small steps: study one idea, compare it with a real Liberian or regional example, and save a short piece of evidence of what you understood.

**01**

**READ**

Find the main idea.

**02**

**WATCH**

Notice a method.

**03**

**MAKE**

Try it locally.

**04**

**REFLECT**

Check what changed.

## Your learning path

### READ FOR THE IDEA

Read for the main idea: Design a booking and customer record process.

### WATCH FOR THE METHOD

Watch for one method or example connected to shared sector problem.

### MAKE EVIDENCE

Apply the idea locally and save integrated capstone.

## ESSENTIAL QUESTION

**How could shared sector problem improve a real situation connected to IT and Technology in Tourism: Digital Tour Operations?**

Write one sentence before you begin. Revisit it after you apply the activity.

## Detailed lesson notes

### CONCEPT NOTE

This original lecture note places “Design a booking and customer record process.” inside the wider work of IT and Technology in Tourism: Digital Tour Operations. The week is not only about remembering a definition. It is about understanding the choices behind the work: shared problems, collaboration, responsible delivery, and evidence. Begin with a service-sector problem that needs more than one department, then use the linked academic source to compare your first idea with a more formal explanation.

A useful way to learn this topic is to move from a situation to a decision and then to evidence. First describe what is happening and who needs a better result. Next identify the information, people, tools, or constraints that shape the decision. Finally make a small, responsible attempt and explain what you would improve. This sequence keeps self-study practical and prevents a learner from copying a solution without understanding the reason for it.

#### 01 • PURPOSE

Purpose: connect shared sector problem to the outcome “Design a booking and customer record process.”.

#### 02 • METHOD

Method: frame the shared problem, assign perspectives, combine methods, and review the result with others.

#### 03 • EVIDENCE

Evidence: save a short record that another learner could understand and review.

### INSTRUCTIONS • WORK IN ORDER

1. Read the guide and linked source for the main concept; write down two unfamiliar terms.
2. Describe a local or regional example without including private or identifying information.
3. Complete the weekly exercise using safe sample data, a fictional scenario, or your own non-sensitive work.
4. Review your result against the self-check questions and record one improvement for the next session.

### WEEKLY EXERCISE

Exercise: IT and Technology in Tourism: Digital Tour Operations learners should frame the shared problem, assign perspectives, combine methods, and review the result with others. Use the week’s focus as your test case and save integrated capstone.

**Use it this week:** Watch with the IT and Technology in Tourism: Digital Tour Operations learning outcome in mind; take notes on an idea to test locally.

**Turn study into skill**

**PRACTICE LABORATORY**

Complete a guided shared problem and sector context activity using a Liberian or regional case study.

Keep your work simple, local, and real. A basic note, recording, checklist, screenshot, calculation, or plan is valid practice.

**EVIDENCE CHECKLIST**

- ☐ I named the main idea.
- ☐ I noted one example.
- ☐ I tried one small action.
- ☐ I saved integrated capstone.

**SELF-CHECK · BEFORE YOU FINISH**

1. What is the main idea in your own words?
2. Which decision or assumption most affects the result?
3. What evidence would show that your approach is useful and responsible?
4. What is one next action I can test or improve?

**REFLECT AND CONNECT**

In 3–5 sentences, explain how this week's concept could improve a real organisation, community service, workplace, or learner project. Identify one assumption, one risk, and one action you would test next.

---

---

---

# Vocabulary + notebook

Use this final page as a learning checkpoint. Clear terms and brief notes make independent study easier to continue.

## SMALL SELF-STUDY GLOSSARY

**self-directed study (self-study)** means you manage your own learning plan. **learning evidence (evidence)** is the proof you save. A **learning source (source)** is credited to its original provider.

Glossary reference list

**evidence – learning evidence:** A saved note, plan, calculation, recording, checklist, or other item that shows what you can do.

**self-study – self-directed study:** A learner plans, studies, practises, and checks understanding without waiting for a live class.

**source – learning source:** An external reading or video credited to its original provider.

## MY NOTE BANK

The one idea I want to remember:

---

---

The example I will look for this week:

---

---

## FINISH WELL

Choose a time for your next study session. Small regular sessions are more useful than waiting for a perfect long study day.

## SHARE SAFELY

Discuss an idea with a trusted peer, mentor, or colleague. Keep your own notes and do not share sensitive personal or workplace data.

GentsAcademy created this original self-study guide and the learning image representing young Liberian learners. External readings and videos remain owned by their providers. Their title, provider, kind, licence/access note, and official URL are shown above for transparent, responsible use.
